/270 cont./

621 and the children under 15 years of age certainly not exceeding
162 ten, only two or three of them being younger. The physical type
142 seems well preserved; the number of handsome and healthy indi-
viduals—especially among the men—were in the large majority
[141] (Pl. VII, A-B, A /see p. 45 /: Tõnkŏd'daᵕ, around 25 years old;
1.723 meters tall; horizontal cephalic index: 84.65). The dis-
164 eases which rage in the region—yellow fever and smallpox—are
those which eliminate rather than impair. Many natives bear
traces of the last, however. A leper was living in the village.
[732] Along with a blind man, he represented the only infirmities.

•191 Only one native, an escapee from the missions, spoke fluent Portuguese, which it seems he had formerly been able to read and write. Five or six understood it but had a vocabulary of only a few words at their disposal. The others did not know the language at all.

Structure of the Village

616 Kejara aldeia is divided into two exogamous phratries, named
614 respectively Tugare and Čera. The meaning of these terms was
[621] never specifically stated to us; only once, in connection with clan Ki, which means tapir, it was mentioned to us that all the Čera are tapirs. Each of these phratries is divided into several clans (1)

1. The term võbe, which we translate this way, means precisely "group of relatives."

or groups of clans, a list of which follows:

Tugare phratry:
Paiwe (Hedgehog) clan
Ārõre (Catepillar) clan
Ewåguddu (Buriti) clan
Apibore clan.
